Wave Imaging Corporation (WIC) was founded in November 1992 to provide cost effective and innovative document imaging systems to a variety of private industries, as well as local, and county government agencies. WIC has installed and maintained over 50 enterprise document imaging systems and converted over 175 million images via paper and film. The hallmark of WIC has been its ability to meet business needs in complex and heterogeneous computing environments. WIC has expanded into the document centric hosting with e-commerce solutions offerings. WIC is a certified small business by the State of California.

WIC presented Legato and Kofax products to the State of California through MSA 2047. WIC is a Legato Software Premium Partner and Support Provider. WIC has been implementing Legato and Kofax Solutions for Imaging, Document and Content Management, and Workflow requirements for local and county governments throughout the State of California. With EMC's purchase of Legato and recent additional acquisition of Documentum, WIC has expanded its products and services offerings to include EMC and Documentum technologies.

In addition to MSA # 2047 – Imaging, Document Management, and Workflow Project Management, WIC has also been awarded MSA #2051 – Document Conversion Services. WIC has the expertise, experience, and know-how to address all document centric challenges, from end-to-end.
